

DESIGN, INNOVATION AND SAFETY

In autumn 2009 we're happy to introduce a new model of the hanging cradle Knoppa.

Knoppa represents Swedish quality design and is sold all over the world. Knoppa is the only hanging cradle on the market that fulfils the European safety standard for cradles. The new Knoppa model has a unique construction for hanging which makes it very easy to put down and pick up the baby, and also to take off the cover to wash it. The cradle can very swiftly and easily be raised or lowered, disassembled, packed and brought with you when you travel.

The new pattern for the autumn season comes in two colour schemes, pink and green. The original Knoppa pattern is available in grey.

5 SPECIAL FEATURES OF KNOPPA:

- 1** It's very easy to place your baby in, or remove your baby from, the cradle. The sleeping part is attached with no more than three rods, which makes the opening large.
- 2** Knoppa is easily raised or lowered. With no more than a simple press of a button you can raise the cradle to the ceiling if you should need to make the bed below it, or lower the cradle to make it easier to rock.
- 3** The suspension unit of Knoppa has a tension spring that responds to small weights and motions, which makes for good cushioning of lateral motion.
- 4** Knoppa is very easy to pack, and can be collapsed to a height of just 10 cm (4").
- 5** The fabric in the sleeping compartment can be removed from the metal frame at the top of the cradle, and machine-washed when needed.
